OLED technologies for TV application

Chang Ho OH

OLED Development Group, LG Display Co., Ltd., Korea

LG has successfully launched world's 1st OLED TVs, 55inch FHD in 2013 and 77/65/55 inch UHD in 2015, using Oxide TFT & WRGB OLED technologies. LG OLED TV has received a lot of high praises, major awards and good reputations by its perfect image qualities and super slim design. This presentation will introduce the key technologies for LG's large sized OLED Display.
