

Personal Information

Full name	Jochen M. Schneider
Current position	Professor
Organization	RWTH Aachen University
Country	Germany

**Short Biography**

Jochen M. Schneider, Ph.D., is Professor of Materials Chemistry at RWTH Aachen University, Germany. Formerly at Linköping University, Sweden, and Northwestern University, USA, Jochen received his Ph.D. degree in surface engineering from Hull University, UK. His research interest is the materials science of thin films grown by plasma-assisted vapor deposition. During the last 13 years in Aachen his research focus was quantum-mechanically guided design of thin films regarding elasticity and phase stability. Jochen has been awarded the Sofya Kovalevskaya Prize by the Alexander von Humboldt Foundation for excellence in thin film materials science research and was named a Fellow of AVS in 2013 and Max Planck Fellow as well as RWTH Fellow in 2015.
