## **Present and future of OLED displays**

Ho Kyoon CHUNG\*

*Sungkyunkwan Advanced Institute of Nanotechnology, Sungkyunkwan University, Korea*

---

Since the announcement of the OLED display to be used by Apple, it is receiving a great deal of attention not only for mobile devices but also for large size TV's. In particular, OLED displays on plastic have become a major trend for mobile and wearable devices. This talk will discuss the present status of the technology and key challenges for roll-to-roll manufacturing.
