| | |
|------------------|--|
| Full name | Guang-Ping Zhang |
| Current position | Professor |
| Organization | Shenyang National Laboratory for Materials Science, Institute of Metal Research, Chinese Academy of Sciences |
| Country | China |

**Short Biography**

Guang-Ping Zhang, a professor in Shenyang National Laboratory for Materials Science, Institute of Metal Research (IMR), Chinese Academy of Science. He got his Ph.D. degree from IMR in 1997. His research focuses on mechanical behavior of materials at small scales, microstructures and reliability of thin films, nanostructured surfaces and coatings, engineered multilayers, design and development of high-performance layer-structured composites inspired by length scale and interface, and evaluation of microstructure degradation and fatigue reliability of advanced engineering materials. He is a Member of Fatigue and Fracture Committee, Chinese Society of Materials Research and a Member of EuroSIME Technical Committee.
