

**Personal Information**

Full name

Shuji HASEGAWA

Current position

Professor at Department of Physics

Organization

University of Tokyo

Country

Japan

**Short Biography**

He received his DSc. in Physics (Paper Doctor) from The University of Tokyo in 1991 for research on electron holography done at Hitachi Company under supervision of Dr. Akira Tonomura before joining the University of Tokyo. In 1991-1994, he was a research associate in a research group of Professor Shozo Ino at the Department of Physics, University of Tokyo. Since 1994, he promoted to be an associate professor and a Principal Investigator conducting his own group of experimental surface physics in the Department. Since 2009 he is a full professor. He supervised 16 DSc. students and 27 MS students.

His interest has been focused on transport of not only electric charges but also spins at crystal surfaces and 2D nanosheets. He has published about 200 original papers and about 20 review articles and book chapters including three books (in Japanese) of single work.
